SCAN KIOSK II NETWORK ADAPTER

Help simplify the electronic distribution of paper across a network with the Scan Kiosk II. When connected to a compatible imageFORMULA production document scanner,* the Scan Kiosk II is designed to provide businesses with the ability to create a high-volume networked scanning solution to help improve productivity and efficiency as part of a document management system.

NETWORKED DOCUMENT SCANNING CAPABILITY

The Scan Kiosk II creates a networked scanning solution when combined with a compatible imageFORMULA production scanner,* specifically for business environments. The adapter has the capability to support networked document scanning where it was previously unavailable. Uses include centralized scanning environments, where documents arrive in a central location and are converted to digital information like in a corporate mailroom or copy room; for back-file conversion; or, as a day-forward "on-ramp" to multiple workflows. End users in a variety of industries can benefit from using Scan Kiosk II, including legal services, healthcare, insurance, and more.

SIMPLE, FLEXIBLE DESIGN

The Scan Kiosk II features a large, easy-view 10.1-inch, high-definition, color touchscreen display mounted on a tiltable stand that fits easily on a counter or desktop. In addition to the integrated Ethernet port, multiple USB ports allow the network adapter to be connected to a compatible scanner,* keyboard, or mouse for flexible setup and easy use. Plus, a built-in cable management system helps keep the immediate work area organized and efficient.

SCAN AND SEND

The Scan Kiosk II Interface allows for the configuration of file destinations on a network, so end users can easily scan directly to their chosen network folder. Users can also send scanned images to designated email addresses with customizable subject lines and message options. Scans can even be saved to USB memory sticks** when inserted into the available USB slots. The touchscreen design helps make it easy for users to navigate the available functions as well as to preview scanned images.

SECURITY FEATURES* AND ADMINISTRATION

The interface of the Scan Kiosk II adapter allows administrators to control end user options and helps assist with data privacy and data storage policies. Workflows can be configured, customized, and locked down by administrators using the control panel of the network adapter. Access can be limited to configurations set by administrators, who can also create and customize additional, one-touch control panel buttons for their specific needs. In addition to management via the touchscreen interface, a browser-based administration tool is also included, and fleet management is available at no charge via imageWARE Enterprise Management Console.

SPECIFICATIONS

Scan Kiosk II

System Resources:	Intel Core i5 CPU, 128 GB storage, 16 GB RAM
Interface:	USB 3.0 (x4), RJ-45 Ethernet
Network Compatibility:	10/100/1000Base-T x 1
Scanner Compatibility:*	Canon imageFORMULA DR-G1100, DR-G1130, DR-G2110, DR-G2140, DR-X10C II▲▲

Dimensions of Network Adapter (H x W x D)

With Stand:	11.9″ x 10.6″ x 7.4″
Without Stand:	7.0″ x 10.6″ x 1.7″
Weight of Individual Unit:	3.4 lb. (Network Adapter only)
Item Code:	3613C004
Warranty:	90-day; optional eCarePAK extended warranty available

Other Information

Individual Box Dimensions (H x W x D):	15″ x 13″ x 10″
Weight of Individual Box:	10 lb.
Pallet Information Number of Boxes per Pallet:	One
Country of Origin:	Taiwan

What's In The Box

- Scan Kiosk II Network Adapter
- Network Adapter Stand
- Power Cable
- EULA
- Warranty Card
- Flyer with URL for downloadable User Guide and System Administrator Guide
- Packing Materials

---

* All listed components are sold separately and not included with the purchase of the Scan Kiosk II.

** USB memory sticks not included with Scan Kiosk II.
